. Proof of the application of water to beneficial
use must be filed with State Engineer on or before

WITNESS MY HAND AND SEAL this 30th day

Cancelled July 12-1924 the record of this to
refile corrected application within statutory time.

of August, 1968

Robert A. Allen

State Engineer

State Engineer.

This permit is issued subject to all prior rights on the source. The amount of water herein granted is placed at the full statutory amount of 0.8 of a cubic foot per second for the total acreage for which application has been made, notwithstanding the fact that this land has already been granted a complete water right under Permit No. 6800 from Hand Me Down Creek. In this manner the full statutory amount of water maybe diverted from the source described in this permit when there is no water whatsoever available from the stream described in Permit No. 6800. However, the total amount of water which can be diverted from both sources shall not exceed the statutory allowance of 1.6 cubic feet of water per second for the 160 acres proposed to be irrigated under both permits. The applicant will be required at the time of filing proof of beneficial use of water to definitely segregate the areas of land which obtain water for irrigation from each of the streams described in said permits. A substantial head-gate and weir must be installed and maintained at or near the point of diversion to facilitate the measurement and control of water. The State reserves the right to regulate the use of the water herein granted at any and all times. It is distinctly understood that applicant agrees to the terms herein contained.
